SMART SHELF

A comprehensive platform revolutionising library management through artificial intelligence, featuring intuitive user experiences and powerful administrative tools with responsive design across all devices.

User Experience Problems

1. Time-consuming book search
2. Difficulty understanding library layout
3. No chatbot or assistant for instant help
4. Slow service during rush periods
5. Poor mobile usability or no mobile app

Solutions:-

AI-Powered Smart Search

Implement advanced search with filters, autocomplete, and natural language queries to quickly find books.

- **Interactive Library Map**

Provide a digital map with shelf locations and QR code navigation to help users locate books easily.

- **AI Chatbot Assistance**

A multilingual chatbot for instant help, FAQs, book guidance, and personalized recommendations.

- **Online Reservation & Self-Service**

Enable online book reservation, issuing, and returning to reduce queues and speed up service during busy periods.

- **Mobile-Friendly Platform / App**

Build a responsive website or mobile app with e-book reading, notifications, AI support, and offline access.

Multi-Language Support

- English, Hindi, Kannada

- User can switch languages anytime
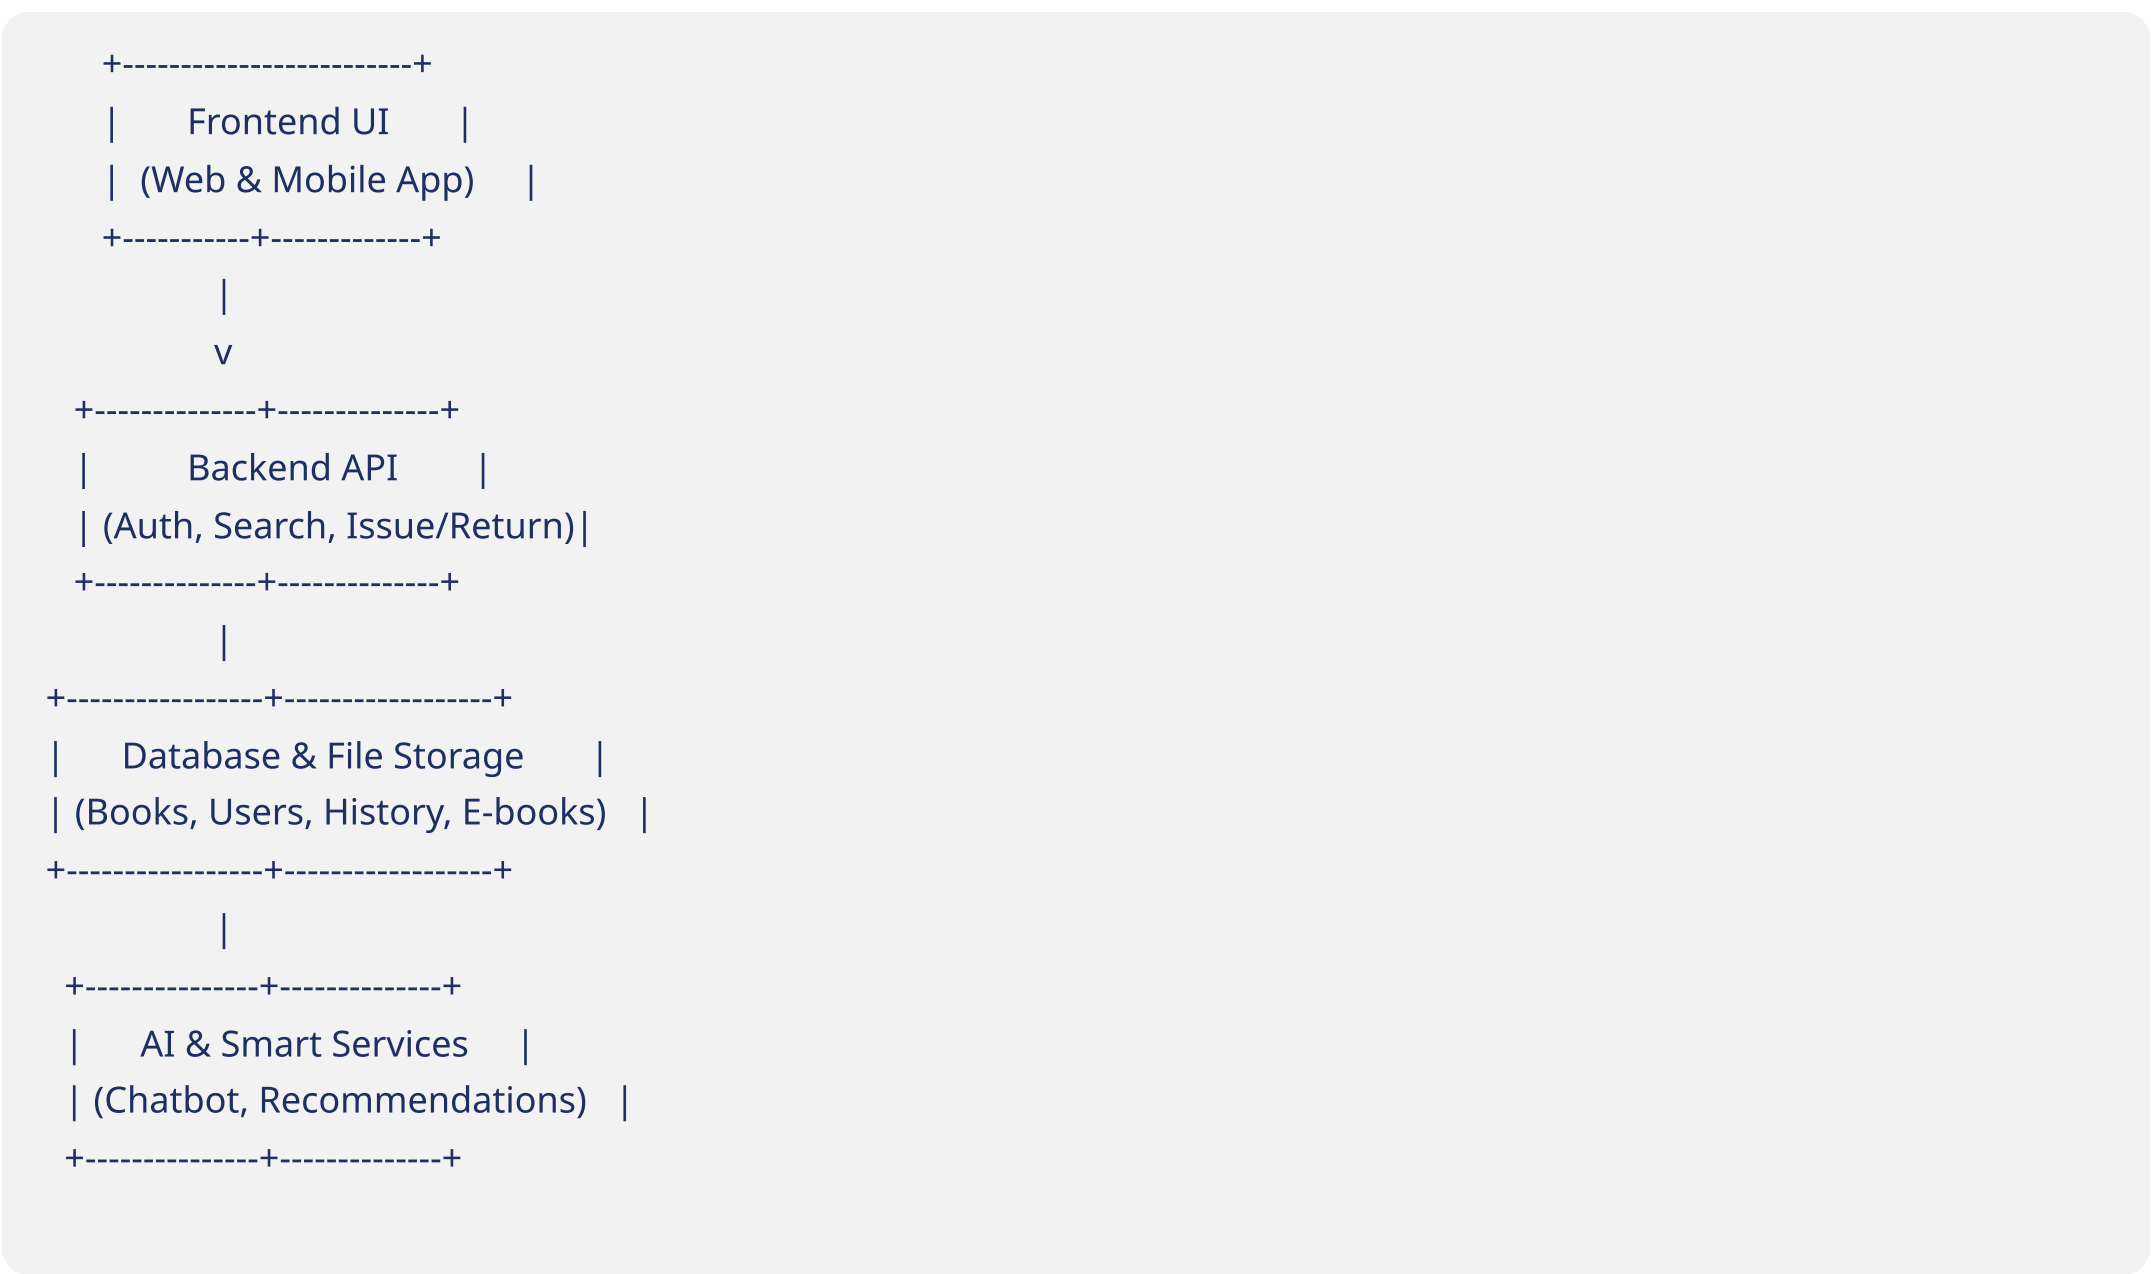

Notifications & Alerts

- Due date reminders

- New arrival alerts

- Event and workshop updates

- Personalized reading suggestions

Smart Search & Voice Search

- Advanced search with filters (author, genre, year, rating)

- Voice search for quick access

- Auto-correct and suggestion-based search
